Course 'Business Software systems' part 2

<u>Assignment on the Help documentation of SAP.</u>

Please use the Help documentation tools of SAP (glossary search of the ABAP keyword documentation, global search of the SAP Help system) to answer the following questions <u>in a concise form</u> (max 1 page):

- Processing loops (iteration) in an ABAP program with the glossary search criterion "loop" (without the statement PROVIDE)
 * short explanation on the different kinds of processing loops in an ABAP program
 * syntax, including the main options, of the corresponding ABAP programming statements

- Logical databases with the glossary search criterion "Logical database" and the global search of
    SAP criterion "Logical database F1S documentation"
  * short explanations on the logical databases, their use and advantages and a concrete example
   of such a database F1S for the airplane flight connections

- SAP Query: creating a single-line basic list with the global search of SAP criteria "SAP Query"
and "single-line basic list"
  * short explanations on the reporting tool SAP Query
  * indication of the 3 main steps to define with that tool a single-line basic list
